Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-16, drawn to a method of modifying the hydrophilicity of a porous article.

Group II, claim(s) 17-22, drawn to an article.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Two groups are directed to an article and a process useful in the general field of the plasma treatment for changing the hydrophilicity of the porous article. Group I has a special technical feature directed to a grounded electrode not required for Group II. Group II has a special technical feature directed to a pore size ranging from 0.05 to 1.5 microns not required for Group I.

A telephone call was made to Melanie Gover on 06/25/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1771

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
